

Product

phenofAST Product

The disposable cassette allows a simultaneous monitoring of the bacteria's response to various antibiotics, thus speeding up the process of finding the most effective treatment.

Each device processes 4 cassettes. Labs can stack multiple devices to increase throughput and save space.

phenofAST provides automatic antibiotic susceptibility report.

Providers survey: Market values are accuracy, time-to-result, cost-effectiveness and broad performance.

Gatekeepers	Frontline Clinicians (EM, ICU, ID)	Microbiologist Laboratory Directors	Operational Laboratory Directors
Priorities for AST	Accuracy Time-to-results Clinically relevant antibiotics	Accuracy Time-to-results Wide range test menu	Operational efficiency Cost effectiveness
